CONTENTS VOLUME 28

NUMBER 1

D. O. Giménez and C. P. Rumi	1	Interaction of night temperature and photoperiod on *Bromus unioloides* H.B.K. aerial biomass components
I. Pepper, N. Galanti, J. Sans and J. F. Lopez Saez	9	Reversible inhibition of root growth and cell proliferation by pentavalent arsenic in *Allium cepa* L.
A. F. Vogelmann and B. N. Rock	19	Anatomy of red spruce needles from forest decline sites in Vermont
R. C. Musselman	27	Acid neutralizing capacity of leaves exposed to acidic fog
R. Kappler and U. Kristen	33	Photometric quantification of water-insoluble polysaccharides produced by *in vitro* grown pollen tubes
E. C. Tseng, J. R. Seiler and B. I. Chevone	37	Effects of ozone and water stress on greenhouse-grown Fraser fir seedling growth and physiology
W. L. Banwart, P. M. Porter, E. L. Ziegler and J. J. Hassett	43	Growth parameter and yield component response of field corn to simulated acid rain
A. H. Chappelka, M. E. Kraemer, T. Mebrahtu, M. Rangappa and P. S. Benepal	53	Effects of ozone on soybean resistance to the Mexican bean beetle (*Epilachna varivestis* Mulsant)
A. M. Castro, C. P. Rumi and H. O. Arriaga	61	Influence of greenbug on root growth of resistant and susceptible barley genotypes
C. A. Zammit and P. H. Zedler	73	Germination response to extreme acidity: impact of simulated acid deposition from a single shuttle launch
Software Survey Section	I	

NUMBER 2

M. W. Miller	83	Editorial
L. Guidi, G. Lorenzini and G. F. Soldatini	85	Phytotoxicity of sea-water aerosols on forest plants with special reference to the role of surfactants
F. Kőrösi, L. András and I. Krakkai	95	Dose distribution anomalies due to unevenly distributed boron in neutron irradiated plant materials
V. N. Bhivare, J. D. Nimbalkar and P. D. Chavan	117	Photosynthetic carbon metabolism in French bean leaves under saline conditions
W. E. Williams, K. Garbutt and F. A. Bazzaz	123	The response of plants to elevated CO_2—V. Performance of an assemblage of serpentine grassland herbs
A. Hidalgo, P. Navas and G. Garcia-Herdugo	131	Growth inhibition induced by vanadate in onion roots
R. Hewamanna, C. M. Samarakoon and P. A. V. N. Karunaratne	137	Concentration and chemical distribution of radium in plants from monazite-bearing soils
L. Silberstein and M. Galun	145	Spectrophotometric estimation of chlorophyll in lichens containing anthraquinones in relation to air pollution assessments

L. L. SIGAL, S. EVERSMAN and D. L. BERGLUND 151 Isolation of protoplasts from loblolly pine needles and their flow-cytometric analysis for air pollution effects

Announcement 163

Software Survey Section I

NUMBER 3

R. MORPURGO and R. ORTIZ 165 Morphological variation of the potato (*Solanum* spp.) under contrasting environments

A. CHROMINSKI, R. B. BHAT, D. J. WEBER and B. N. SMITH 171 Osmotic stress-dependent conversion of 1-aminocyclopropane-1-carboxylic acid (ACC) to ethylene in the halophyte, *Allenrolfea occidentalis*

D. A. SCHAEFER, W. A. REINERS and R. K. OLSON 175 Factors controlling the chemical alteration of throughfall in a subalpine balsam fir canopy

I. A. TRAUTMANN and J. H. VISSER 191 The assimilation of aspartic and glutamic acids by the root parasites *Alectra orobanchoides* Benth. and *Alectra vogelii* Benth. (Scrophulariaceae)

W. NAGL 197 Genome changes induced by auxin-herbicides in seedlings and calli of *Zea mays* L.

C. D. DUSTIN and D. J. RAYNAL 207 Effects of simulated acid rain on sugar maple seedling root growth

L. P. NYMAN and J. A. ARDITTI 215 Effects of artificial seawater on morphology and anatomy of taro (*Colocasia esculenta* var *antiquorum*, Araceae) tissues *in vitro*

J. T. HARRINGTON and J. R. SEILER 225 Acetylene reduction in black alder seedlings as affected by direct and indirect moisture deficits using a split-pot growing system

F. J. CASTILLO and H. GREPPIN 231 Extracellular ascorbic acid and enzyme activities related to ascorbic acid metabolism in *Sedum album* L. leaves after ozone exposure

T. YOUNGLOVE, P. M. MCCOOL, R. C. MUSSELMAN and E. D. SMITH 239 The use of transfer function models to describe the relationship between pollutant exposure and leaf stomatal opening

L.-C. HUANG and D.-L. CHI 249 Pivotal roles of picloram and gelrite in banana callus culture

K. U. PAI and B. K. GAUR 259 Enzymatic lipid peroxidation and its prevention by succinate in mitochondria isolated from gamma-irradiated bean hypocotyls

R. J. LEBOWITZ 267 Digital image analysis measurement of root length and diameter

Software Survey Section I

NUMBER 4

R. E. SOJKA 275 A review: Measurement of root porosity (volume of root air space)

X. Y. CHENG and M. W. GAO 281 Biological and genetic effects of combined treatments of sodium azide, gamma rays and EMS in barley

J. R. SHANN and D. C. ADRIANO 289 The chronic exposure of selected crop species to boron aerosols

D. L. TAO, Y. H. JIN and Y. J. DU 301 Novel photosynthesis–light curves of solar-exposed versus shaded Korean pine seedlings

P. M. McCool, R. C. Musselman, T. Younglove and R. R. Teso	307	Response of kidney bean to sequential ozone exposures
M. Torres, S. Perez-Boada and J. M. Duran	315	Growth analysis by different mathematical models of barley plants after u.v.-A irradiation
P. J. Temple	323	Injury and growth of Jeffrey pine and giant sequoia in response to ozone and acidic mist
Z. Tomaszewski, Jr., B. V. Conger, H. Brunner and F. J. Novak	335	Effects of gamma radiation on the *in vitro* response of *Dactylis glomerata* leaf segments
F. Murray and S. Wilson	343	Joint action of sulfur dioxide and hydrogen fluoride on growth of *Eucalyptus tereticornis*
J. R. Mahan and D. R. Upchurch	351	Maintenance of constant leaf temperature by plants—I. Hypothesis—limited homeothermy
D. R. Upchurch and J. R. Mahan	359	Maintenance of constant leaf temperature by plants—II. Experimental observations in cotton
C. Rinallo, A. Bennici and E. Cenni	367	Effects of two surfactants on *Triticum durum* Desf. plantlets
M. J. Olszewska, H. Kuran and K. Marciniak	375	Relationship between resumption of rRNA transport into cytoplasm after cold treatment and progression through the cell cycle in root meristem cells
H. F. Crowell and R. E. J. Boerner	381	Influences of mycorrhizae and phosphorus on belowground competition between two old-field annuals
Software Survey Section	I

SUBJECT INDEX

Abies balsamea (L.) Mill (balsam fir)
factors controlling chemical alteration of throughfall in subalpine canopy of 175
Abies fraseri (Fraser fir)
effect of ozone, water stress on growth, physiology of greenhouse-grown seedlings of 37
ACC (1-aminocyclopropane-1-carboxylic acid)
osmotic stress-dependent conversion of, to ethylene in halophyte *Allenrolfea occidentalis* 171
Acer saccharum Marsh. (sugar maple)
effects of simulated acid rain on seedling root growth of 207
Acetylene reduction
in black alder seedlings as affected by direct and indirect moisture deficits using a split-pot growing system 225
Acid neutralizing capacity
of leaves exposed to acid fog 19
Acid rain, simulated
effect of, on growth and yield components of field corn 43
effects of, on sugar maple seedling root growth 207
Acid, simulated deposition
from a single shuttle launch; impact of, on germination response 73
Acidic fog
acid neutralizing capacity of leaves exposed to 27
Acidic mist
injury and growth of Jeffrey pine and giant sequoia in response to ozone and 323
Acidity, extreme
germination response to; impact of simulated acid deposition from a single shuttle launch 73
Aerosols, boron
chronic exposure of selected crop species to, ... 289
Aerosols, seawater
phytotoxicity of, on forest plants, with reference to role of surfactants 85
Air pollution assessments
spectrophotometric estimation of chlorophyll in lichens containing anthraquinones in relation to 145
Air pollution effects
isolation of protoplasts from loblolly pine needles, flow cytometric analysis for 151
Air space, root
volume of; a review: measurement of root porosity 275
Alder, black
acetylene reduction in, seedlings as affected by direct, indirect moisture deficits using a split-pot growing system 225
Alectra orobanchoides Benth.
assimilation of aspartic and glutamic acids by root parasites, and *Alectra vogelii* Benth. (Scrophulariaceae) 191
Alectra vogelii Benth.
assimilation of aspartic acids by root parasites *Alectra orobanchoides* Benth. and 191
Allenrolfea occidentalis
osmotic stress-dependent conversion of 1-aminocyclopropane-1-carboxylic acid (ACC) to ethylene in halophyte 171
Allium cepa L. (onion)
growth inhibition induced by vanadate in roots of 131
inhibition of root growth, cell proliferation in, by pentavalent arsenic 9
Alnus glutinosa L. (black alder)
acetylene reduction in seedlings of, as affected by direct, indirect moisture deficits using a split-pot system 225
1-Aminocyclopropane-1-carboxylic acid (ACC)
osmotic stress-dependent conversion of, to ethylene in the halophyte *Allenrolfea occidentalis* 171
Analysis, growth
by different mathematical models of barley plants after u.v.-A irradiation 315
Anatomy (*in vitro* tissues of *Colocasia*)
effects of artificial seawater on morphology and, of taro (*Colocasia esculenta* var. *antiquorum*, Araceae) tissues *in vitro* 215
Anatomy, red spruce needles
from forest decline sites in Vermont 19
Annuals, old-field
influences of mycorrhizae and phosphorus on belowground competition between two 381
Anthraquinones
spectrophotometric estimation of chlorophyll in lichens containing, in relation to air pollution assessments 145

Arsenic, pentavalent
inhibition of root growth and cell proliferation in *Allium cepa* by 9
Artificial seawater
effect of, on morphology, anatomy of Taro (*Colocasia esculenta* var. *antiquorum*, Araceae) tissues *in vitro* 215
Ascorbic acid, extracellular
and enzyme activities related to ascorbic acid metabolism in *Sedum album* L. leaves after ozone exposure 231
Aspartic acid
assimilation of, and glutamic acid by root parasites *Alectra orobanchoides* Benth. and *Alectra vogelii* Benth. (Scrophulariaceae) 191
Assimilation
of aspartic, glutamic acids by root parasites *Alectra orobanchoides Benth. and Alectra vogelii* Benth. (Scrophulariaceae) 191
Auxin-herbicides
genome changes induced by, in seedlings and calli of *Zea mays* L. 197
Balsam fir
factors controlling chemical alteration of throughfall in subalpine canopy of 175
Banana callus culture
pivotal roles of picloram and gelrite in 249
Barley
biological, genetic effects of combined treatments of sodium azide, gamma rays and EMS in 281
Barley plants
growth analysis by different mathematical models of, after u.v.-A irradiation 315
Barley, root growth of
influence of greenbug on, in resistant and susceptible genotypes 61
Bean hypocotyls, gamma-irradiated
enzymatic lipid peroxidation and its prevention by succinate in mitochondria isolated from 259
Bean, kidney
response of, to sequential ozone exposures 307
Bean, photosynthetic carbon metabolism
in leaves of French, under saline conditions 117
Belowground competition
influences of mycorrhizae and phosphorus on, between two old-field annuals 381
Biological effects
and genetic effects of combined treatments of sodium azide, gamma rays and EMS in barley 281
Biomass, aerial components
interaction of night temperature and photoperiod on, *Bromus unioloides* HBK 1
Black alder
acetylene reduction in seedlings of, as affected by direct and indirect moisture deficits using a split-pot growing system 225
Boron aerosols
chronic exposure of selected crop species to 289
Boron, in plant materials
dose anomalies due to unevenly distributed in neutron irradiated plant materials 95
Bromus unioloides HBK
interaction of night temperature and photoperiod of aerial biomass components of 1
Calli (*Zea mays*)
genome changes induced by auxin herbicides in seedlings and 197
Callus culture, banana
pivotal roles of picloram and gelrite in 249
Canopy, balsam fir
factors controlling chemical alteration of throughfall in a subalpine 175
Carbon metabolism, photosynthetic
in French bean leaves under saline conditions 117
Cell cycle, progression through the
relationship between the resumption of rRNA transport into the cytoplasm after cold treatment and the, in root meristem cells 375
Cell proliferation
inhibition of, and of root growth in *Allium cepa* L. by pentavalent arsenic 9
Cells, root meristem
relationship between the resumption of rRNA transport into cytoplasm after cold treatment and progression through cell cycle 375

Chemical alteration of throughfall
factors controlling the, in a subalpine balsam fir canopy 175
Chemical distribution, radium
and concentration in plants from monazite-bearing soils 137
Chlorophyll, spectrophotometric estimation of
in lichens containing anthraquinones, in relation to air pollution assessments 145
CO_2, elevated
response of plants to; performance of an assemblage of serpentine grassland herbs 123
Cold treatment
relationship between resumption of rRNA transport into cytoplasm after, and progression through the cell cycle in root meristem cells 375
Coleus scutellarioides (L.) Bentham
digital image analysis measurement of root length and diameter of 267
Colocasia esculenta var. *antiquorum* (Taro)
effects of artificial seawater on morphology and anatomy of, tissues *in vitro* 215
Competition, belowground
influences of mycorrhizae and phosphorus on, between two old-field annuals 381
Concentration, radium
and chemical distribution in plants from monazite-bearing soils 137
Corn, field
growth parameter and yield component response of, to simulated acid rain 43
Cotton (*Gossypium hirsutum*)
maintenance of constant leaf temperature by plants—II. Experimental observations in 359
Cytoplasm, resumption of rRNA transport into,
after cold treatment, relationship between progression through the cell cycle and, in root meristem cells 375
Dactylis glomerata (orchardgrass)
leaf segments; effects of gamma radiation on the *in vitro* response of 335
Dose, neutron irradiation
distribution anomalies due to unevenly distributed boron in neutron irradiated plant materials 95
Digital image analysis
measurement of root length and diameter 267
Enzymatic lipid peroxidation
and its prevention by succinate in mitochondria isolated from gamma-irradiated bean hypocotyls 259
Enzyme activities, extracellular
related to ascorbic acid metabolism, and extracellular ascorbic acid in *Sedum album* L. leaves after ozone exposure 231
Environments, contrasting
morphological variations of potato (*Solanum* spp.) under 165
Epilachna varnesis Mulsant (Mexican bean beetle)
effects of ozone on soybean resistance to 53
Ethylene
osmotic stress-dependent conversion of 1-aminocyclopropane-1-carboxylic acid (ACC) to, in the halophyte *Allenrolfea occidentalis* 171
Eucalyptus tereticornis
joint action of sulfur dioxide and hydrogen fluoride on growth of 343
Exposure, chronic
to boron aerosols, of selected crop species 289
Extracellular ascorbic acid
and enzyme activities related to ascorbic acid metabolism in *Sedum album* L. leaves after ozone exposure 231
Extracellular enzyme activities
and extracellular ascorbic acid related to ascorbic acid metabolism in *Sedum album* L. leaves after ozone exposure 231
Fir, balsam
factors controlling chemical alteration of throughfall in a subalpine canopy of 175
Flow-cytometric analysis
of protoplasts isolated from loblolly pine needles for air pollution effects 151
Fog, acidic
acid neutralizing capacity of leaves exposed to 27
Forest decline
sites in Vermont, anatomy of red spruce needles from 19

Forest plants
phytotoxicity of sea-water aerosols on, with special reference to role of surfactants 85
Fir, Fraser
effects of ozone and water stress on growth and physiology of greenhouse-grown seedlings of 37
Gamma radiation
effects of, on the *in vitro* response of *Dactylis glomerata* leaf segments 335
Gamma rays
biological and genetic effects of, combined treatments of sodium azide, EMS and, in barley 281
Gamma-irradiated bean hypocotyls
enzymatic lipid peroxidation and its prevention by succinate and mitochondria isolated from 259
Gelrite
pivotal roles of picloram and, in banana callus culture 249
Genetic effects
and biological effects of combined treatments of sodium azide, gamma rays and EMS in barley 281
Genome changes
induced by auxin-herbicides in seedlings and calli of *Zea mays* L. 197
Germination response
to extreme acidity; impact of simulated acid deposition from a single shuttle launch on 73
Giant sequoia
injury and growth of Jeffrey pine and, in response to ozone and acidic mist 323
Glutamic acid
assimilation of aspartic and, by root parasites *Alectra orobanchoides* Benth. and *Alectra vogelii* Benth. (Scrophulariaceae) 191
Glycine max L. (soybean)
effects of ozone on resistance of, to the Mexican bean beetle (*Epilachna varivestis* Mulsant) 53
Gossypium hirsutum (cotton)
maintenance of constant leaf temperature by plants of, experimental observations in 359
Grassland herbs, serpentine
response to elevated CO_2, performance of an assemblage of, ... 123
Greenbug
influence of, on root growth of resistant and susceptible barley genotypes 61
Growth
and injury of Jeffrey pine and giant sequoia in response to ozone and acidic mist 323
Growth analysis
by different mathematical models of barley plants after u.v.-A irradiation 315
Growth inhibition
induced by vanadate in onion roots 131
Growth, of *Eucalyptus tereticornus*
joint action of sulfur dioxide and hydrogen fluoride on 343
Growth, of greenhouse-grown Fraser fir seedlings
effects of ozone and water stress on physiology and 37
Growth, of onion roots
inhibition of, induced by vanadate 131
Growth, of sugar maple roots
effects of simulated acid rain on 207
Growth parameter
and yield component response of field corn to simulated acid rain 43
Halophyte, *Allenrolfea occidentalis*
osmotic stress-dependent conversion of 1-aminocyclopropane-1-carboxylic acid (ACC) to ethylene in the 171
Herbicides, auxin-
genome changes induced by, in seedlings and calli of *Zea mays* L. 197
Homeothermy, limited
maintenance of constant leaf temperature by plants—I. Hypothesis of 351
Hordeum vulgare L. (barley)
influence of greenbug on root growth of resistant and susceptible genotypes of 61
Hydrogen fluoride
joint action of sulfur dioxide and, on growth of *Eucalyptus tereticornus* 343
Hypocotyls, bean
enzymatic lipid peroxidation and its prevention by succinate in mitochondria isolated from gamma-irradiated 259
Injury
and growth of Jeffrey pine and giant sequoia in response to ozone and acidic mist 323

In vitro (calli; *Musa sapientum* L.)
pivotal roles of picloram and gelrite in banana callus culture 249
In vitro (calli; *Zea mays* L.)
genome changes induced by auxin-herbicides in seedlings and calli of 197
In vitro (pollen tubes)
production of water-insoluble polysaccharides by pollen tubes grown, photometric quantification of 33
In vitro response
of *Dactylis glomerata* leaf segments; effects of gamma radiation on the 335
In vitro tissues of taro
effects of artificial seawater on morphology and anatomy of, (*Colocasia esculenta* var. *antiquorum*, Araceae) 215
Inhibition
and cell proliferation in *Allium cepa* L. by pentavalent arsenic 9
Image analysis, digital
measurement of root length and diameter 267
Irradiation, u.v.-A
growth analysis by different mathematical models of barley plants after 315
Isolated mitochondria
from gamma-irradiated bean hypocotyls; prevention of enzymatic lipid peroxidation by succinate 259
Isolation of protoplasts
from loblolly pine needles and their flow-cytometric analysis for air-pollution effects 151
Jeffrey pine (*Pinus jeffreyi*)
injury and growth of giant sequoia and, in response to ozone and acidic mist 323
Kidney bean (*Phaseolus vulgaris*)
response of, to sequential ozone exposures 307
Korean pine (*Pinus koraiensis*)
novel photosynthesis–light curves of solar-exposed *versus* shaded seedlings of 301
Leaf segments
in vitro response of *Dactylis glomerata*; effects of gamma radiation on, ... 335
Leaf stomatal opening
use of transfer function models to describe the relationship between pollutant exposure and 239
Leaf temperature
maintenance of constant, by plants—I. Hypothesis—limited homeothermy 351
maintenance of constant, by plants—II. Experimental observations in cotton 359
Leaves, acid neutralizing capacity of
exposed to acidic fog 27
Leaves, French bean
photosynthetic carbon metabolism in, under saline conditions 117
Leaves; loblolly pine needles
isolation of protoplasts from, and their flow-cytometric analysis for air pollution effects 151
Leaves, of *Sedum album* L.
extracellular ascorbic acid and enzyme activities related to ascorbic acid metabolism in, after ozone exposure 231
Leaves, photosynthetic carbon metabolism
in French bean, under saline conditions 117
Leaves; red spruce needles
anatomy of, from forest decline sites in Vermont 19
Lichens, anthraquinone-containing
spectrophotometric estimation of chlorophyll in, in relation to air pollution assessments 145
Lipid peroxidation enzymatic
and its prevention by succinate in mitochondria isolated from gamma-irradiated bean hypocotyls 259
Loblolly pine
isolation of protoplasts from needles of, and their flow-cytometric analysis for air pollution effects 151
Maple, sugar
effects of simulated acid rain on seedling root growth of 207
Meristem cells, root
relationship between the resumption of rRNA transport into the cytoplasm after cold treatment and progress through the cell cycle in 375
Metabolism, ascorbic acid
extracellular ascorbic acid and enzyme activities related to, in *Sedum album* L. leaves after ozone exposure 231
Mathematical models, different
growth analysis by, of barley plants after u.v.-A irradiation 315
Mexican bean beetle (*Epilachna varivestis* Mulsant)
effects of zone on soybean resistance to 53

Mist, acidic
injury and growth of Jeffrey pine and giant sequoia in response to ozone and 323
Mitochondria, isolated
from gamma-irradiated bean hypocotyls; prevention of enzymatic lipid peroxidation by succinate 259
Models, mathematical
growth analysis by different, of barley plants after u.v.-A irradiation 315
Models, transfer function
use of, to describe relationship between pollutant exposure and leaf stomatal opening 239
Moisture deficits, direct and indirect
acetylene reduction in black alder seedlings as affected by, using a split-pot growing system 225
Monazite-bearing soils
concentration and chemical distribution of radium in plants from 137
Morphological variation
of the potato (*Solanum* spp.) under contrasting environments 165
Morphology (*in vitro* tissues of *Colocasia*)
effects of artificial seawater on anatomy and, of taro (*Colocasia esculenta* var. *antiquorum*, Araceae) tissues *in vitro* 215
Musa sapientum L. (banana)
pivotal role of picloram and gelrite in callus culture of 249
Mycorrhizae
influences of phosphorus and, on belowground competition between two old-field annuals 381
Needles, loblolly pine
isolation of protoplasts from, and their flow-cytometric analysis for air pollution effects 151
Needles, red spruce
anatomy of, from forest decline sites in Vermont 19
Neutron irradiated plant materials
dose distribution anomalies due to unevenly distributed boron in 95
Nicotiana sylvestris, in vitro pollen tubes of
production of water-soluble polysaccharides by, photometric quantification of 33
Old-field annuals
influence by mycorrhizae and phosphorus on belowground competition between two 381
Onion root
growth inhibition induced by vanadate in 131
inhibition of growth and cell proliferation in, by pentavalent arsenic 9
Orchardgrass (*Dactylis glomerata*)
leaf segments; effects of gamma radiation on the *in vitro* response of 335
Osmotic stress
-dependent conversion of 1-aminocyclopropane-1-carboxylic acid (ACC) to ethylene in the halophyte, *Allenrolfea occidentalis* 171
Ozone
injury and growth of Jeffrey pine and giant sequoia in response to acidic mist and 323
Ozone, effects of
on soybean resistance to the Mexican bean beetle (*Epilachna varivestis* Mulsant) 53
and water stress on greenhouse-grown Fraser fir growth and physiology 37
Ozone exposure
extracellular ascorbic acid and enzyme activities related to ascorbic acid metabolism in *Sedum album* L. leaves after 231
Ozone, sequential exposures
response of kidney bean to 307
Parasites, root
assimilation of aspartic and glutamic acids by the, *Alectra orobanchoides* Benth. and *Alectra vogelii* Benth. (Scrophulariaceae) 191
Peroxidation, lipid
enzymatic, and its prevention by succinate in mitochondria isolated from gamma-irradiated bean hypocotyls ... 259
Phaseolus vulgaris L. (French bean)
photosynthetic carbon metabolism in leaves of, under saline conditions 117
Phaseolus vulgaris (kidney bean)
response of, to sequential ozone exposures 307
Phaseolus vulgaris, mitochondria
enzymatic lipid peroxidation and its prevention by succinate in mitochondria isolated from gamma-irradiated hypocotyls of 259

Phosphorus
influences of mycorrhizae and, on belowground competition between two old-field annuals 381
Photometric quantification
of water-insoluble polysaccharides produced by *in vitro* pollen tubes 33
Photoperiod
interaction of, with night temperature of *Bromus unioloides* HBK aerial biomass components 1
Photosynthesis–light curves, novel
of solar-exposed vs shaded Korean pine seedlings 301
Photosynthetic carbon metabolism
in French bean leaves under saline conditions 117
Phytotoxicity, of sea-water aerosols
on forest plants, with special reference to the role of surfactants 85
Picea rubens (red spruce)
needle anatomy of, from forest decline sites in Vermont 19
Picloram (4-amino-3,5,6-trichloropicolinic acid)
pivotal roles of gelrite and, in banana callus culture 249
Pine, loblolly
isolation of protoplasts from needles of, and their flow-cytometric analysis for air pollution effects 151
Pinus jeffreyi (Jeffrey pine)
injury and growth of giant sequoia and, in response to ozone and acidic mist 323
Pinus koraiensis (Korean pine)
novel photosynthesis–light curves of solar-exposed vs shaded seedlings of 301
Pinus taeda L. (loblolly pine)
isolation of protoplasts from needles of, and their flow-cytometric analysis for air pollution effects 151
Plantlets, of *Triticum durum* Desf
effects of two-surfactants on 367
Pollen tubes, *in vitro* grown
photometric quantification of water-insoluble polysaccharides produced by 33
Pollutant exposure
use of transfer function models to describe relationship between leaf stomatal opening and 239
Pollution assessments, air
spectrophotometric estimation of chlorophyll in anthraquinone-containing lichens in relation to 145
Polysaccharides, water-insoluble
photometric quantification of, produced by *in vitro* grown pollen tubes 33
Porosity, root
A review: measurement of 275
Potato, morphological variation of
under contrasting environments 165
Protoplasts, isolation of
from loblolly pine needles and their flow-cytometric analysis for air pollution effects 151
Radium
concentration and chemical distribution of, in plants from monazite-bearing soils 137
Reduction, acetylene
in black alder seedlings as affected by direct and indirect moisture deficits using a split-pot growing system 225
Resistance, of soybean
to Mexican bean beetle (*Epilachna varivestis* Mulsant), effects of ozone on 53
Resistant genotype, of barley
influence of greenbug on root growth of, and of susceptible genotype 61
Response
of kidney bean to sequential ozone exposures 307
Response to elevated CO_2
of plants; performance of an assemblage of serpentine grassland herbs 123
Root
measurement of porosity of; A review 275
Root growth
effects of simulated acid rain on, in sugar maple seedlings 207
of resistant and susceptible barley genotypes, influence of greenbug on 61
Root growth inhibition
and inhibition of cellular proliferation in *Allium cepa* L. by pentavalent arsenic 9
induced by vanadate in onion 131
Root; length and diameter measurement
by digital image analysis 267

Root meristem cells
relationship between resumption of rRNA transport into the cytoplasm after cold treatment and progression through the cell cycle in 375
Root parasites
assimilation of aspartic and glutamic acids by the, *Alectra orobanchoides* Benth. and *Alectra vogelii* Benth. (Scrophulariaceae) 191
Root porosity
measurement of (volume of root air space); A review 275
Roots, barley
influence of greenbug on growth of, in resistant and susceptible genotypes 61
Roots, onion
growth inhibition induced by vanadate in 131
inhibition of growth and cell proliferation in, by pentavalent arsenic 9
rRNA transport, resumption of
in cytoplasm after cold treatment; relationship between progression through the cell cycle and, in root meristem cells 375
Saline conditions
photosynthetic carbon metabolism in French bean leaves under 117
Schizaphis graminum Pone. (greenbug)
influence of, on root growth of resistant and susceptible barley genotypes 61
Sea-water aerosols
phytotoxicity of, on forest plants with special reference to the role of surfactants 85
Seawater, artificial
effects of, on morphology and anatomy of taro (*Colocasia esculenta* var. *antiquorum*, Araceae) *in vitro* 215
Sedum album L.
extracellular ascorbic acid and enzyme activities related to ascorbic acid metabolism in leaves of, after ozone exposure 231
Seedling, sugar maple
effects of simulated acid rain on root growth of 207
Seedlings, black alder
acetylene reduction in, as affected by direct and indirect moisture deficits using a split-pot growing system 225
Seedlings, Fraser fir
effect of ozone and water stress on growth and physiology of greenhouse-grown 37
Seedlings, growth of
effects of ozone and water stress on physiology and, of greenhouse-grown Fraser fir 37
Seedlings, Korean pine
novel photosynthesis–light curves of solar exposed vs shaded 301
Seedlings, (*Zea mays*)
genome changes induced by auxin-herbicides in, and calli of 197
Sequoia giganteum (giant sequoia)
injury and growth of Jeffrey pine and, in response to ozone and acidic mist 323
Serpentine grassland herbs
response of elevated CO_2; performance of an assemblage of 123
Shuttle, space
simulated acid deposition from a single launch of, impact of extreme acidity on germination response 73
Sodium azide
biological and genetic effects of combined treatments of gamma rays, EMS and, in barley 281
Software Survey Section ..... in all issues I
Soils, monazite-bearing
concentration and chemical distribution of radium in plants from, ... 137
Solanum spp. (potato)
morphological variation of, under contrasting environments 165
Soybean
effects of ozone on resistance to the Mexican bean beetle (*Epilachna varivestias* Mulsant) in 53
Spectrophotometric estimation of chlorophyll
in lichens containing anthraquinones in relation to air pollution assessments 145
Split-pot growing system
acetylene reduction in black alder seedlings as affected by direct and indirect moisture deficits using a 225
Spruce red
anatomy of needles of, from forest decline sites in Vermont 19
Stomatal opening, leaf
use of transfer function models to describe relationship between pollutant exposure and 239

Subalpine balsam fir canopy
factors controlling chemical alteration of throughfall in a ... 175
Succinate, prevention of enzymatic lipid peroxidation by
in mitochondria isolated from gamma-irradiated bean hypocotyls ... 259
Sugar maple
effects of simulated acid rain on seedling root growth of ... 207
Sulfur dioxide
joint action of hydrogen fluoride and, on growth of *Eucalyptus tereticornis* ... 343
Surfactants
effects of two, on *Triticum durum* Desf. plantlets ... 367
Surfactants, sea-water
phytotoxicity of sea-water aerosols on forest plants, with special reference to the role of ... 85
Susceptible genotype, of barley
influence of greenbug on root growth of, and of resistant genotype ... 61
Taro (*Colocasia esculenta*)
effects of artificial seawater on morphology and anatomy of, tissues *in vitro* ... 215
Temperature, leaf
maintenance of constant, by plants—I. Hypothesis—limited homeothermy ... 351
maintenance of constant, by plants—II. Experimental observations in cotton ... 359
Temperature, night
interaction of, with photoperiod on *Bromus unioloides* HBK aerial biomass components ... 1
Throughfall
factors controlling chemical alteration of, in a subalpine balsam fir canopy ... 175
Transfer function models
use of, to describe relationship between pollutant exposure and leaf stomatal opening ... 239
Triticum durum Desf. (wheat)
effects of two surfactants on plantlets of ... 367
u.v.-A irradiation
growth analysis by different mathematical models of barley plants after ... 315
Vanadate
growth inhibition induced by, in onion roots ... 131
Variation, morphological
of the potato (*Solanum* spp.) under contrasting environments ... 165
Vermont, forest decline sites in
anatomy of red spruce needles from ... 19
Water stress
effects of ozone and, on greenhouse-grown Fraser fir seedling growth and physiology ... 37
Wheat (*Triticum durum* Desf.)
effects of two surfactants on plantlets of ... 367
Yield
and growth parameter response of field corn to simulated acid rain ... 43
Zea mays (corn)
growth parameter and yield component response of field, to simulated acid rain ... 43

PRINTED IN GREAT BRITAIN AT ABERDEEN UNIVERSITY PRESS
